

Nicholas Swainston *Full-Stack Developer | React, Next.js, TypeScript & AI Workflow Automation*

nmswainston@gmail.com | 480-270-2442 | Avondale, Arizona | nmswainston.com | linkedin.com/in/nmswainston

PROFILE

Full-stack developer with experience building responsive web applications, client-facing websites, internal tools, and AI-assisted workflow automations. Skilled in React, Next.js, TypeScript, API integrations, Git/GitHub, and translating business needs into practical software solutions. Background in automation systems and technical troubleshooting brings a hands-on, product-minded approach to building reliable tools that improve real business operations.

PROJECTS

- | | |
|--|-------------------|
| Oasis Help Desk, <i>Internal Knowledgebase Platform</i> | 04/2026 – Present |
| <ul style="list-style-type: none">- Designed and developed a searchable internal knowledgebase for home automation and AV support workflows using React and Tailwind- Built structured documentation and tag-based navigation to improve technician access to troubleshooting resources and client support information- Focused on scalable UI architecture, responsive design, and operational usability for real-world field service environments- Implemented modern frontend tooling, reusable components, and AI-assisted development workflows to accelerate iteration and content organization | |
| Litchfield Perk Website, <i>www.litchfieldperk.com</i> | 12/2025 – 02/2026 |
| <ul style="list-style-type: none">- Built and deployed a production React/Tailwind website with client-managed content- Responsive layouts, and improved mobile usability.- Integrated Google Places API for live review data and third-party content embeds. Implemented Decap CMS and structured content data to support client-managed updates without developer involvement.- Improved cross-browser behavior, mobile UX, and performance across Safari, Edge, and responsive breakpoints. | |
| SaaS Automation MVP, <i>Automated Business Concepts</i> | 08/2022 – 02/2023 |
| <ul style="list-style-type: none">- Designed and built an MVP for a workflow automation platform focused on improving business operations.- Defined system architecture, core requirements, user flows, and early product roadmap.- Coordinated remote contributors and managed development milestones from concept through MVP delivery.- Used AI-assisted workflows to speed up planning, documentation, iteration, and feature development. | |

WORK EXPERIENCE

- | | |
|--|-------------------|
| console.log(ic) Studios, <i>Freelance Web Developer / Owner</i> | 07/2025 – Present |
| <ul style="list-style-type: none">- Design and develop responsive web applications using React, Next.js, TypeScript, and Tailwind.- Build reusable components, API-connected features, and client-facing tools with a focus on performance, accessibility, and maintainability.- Translate business requirements into working software through rapid prototyping, iteration, and client feedback.- Use AI development tools such as Cursor and ChatGPT to accelerate debugging, refactoring, planning, and implementation. | |
| Oasis Luxury Smart Homes, <i>Field Service Technician</i> | 02/2023 – Present |
| <ul style="list-style-type: none">- Program and service Control4 automation systems for lighting, audio, video, and security- Install and troubleshoot networks, surveillance systems, and IP-based devices- Collaborate with contractors and clients to deliver and support high-end installations- Maintain and improve company website through SEO and technical updates- Identify workflow gaps in field service operations and apply technical troubleshooting, documentation, and automation-minded thinking to improve support processes. | |
| Automated Business Concepts, <i>Technology Lead (MVP Startup)</i> | 08/2022 – 02/2023 |
| <ul style="list-style-type: none">- Led development of a SaaS automation MVP, defining system architecture and core features- Managed remote developers and coordinated delivery of early-stage product milestones | |

EDUCATION

- | | |
|---|-------------------|
| Continuing Education: Full-Stack Development, Generative AI, and Python, <i>Coursera</i> | 06/2025 – Present |
| AAS in Business, <i>Eastern Arizona College</i> | 06/2014 – 06/2015 |
| Project Management in Business, <i>Eastern Arizona College</i> | 06/2014 – 06/2015 |

SKILLS

Full Stack Development: React • Next.js • TypeScript • JavaScript • Node.js fundamentals • API routes • Server-side Rendering • REST APIs • Git/GitHub • Pull Requests • Responsive Design • Semantic HTML • CSS • Tailwind CSS | **AI & Automation:** Cursor • ChatGPT • AI-assisted development • LLM workflow automation • Business process automation • prompt-driven development | **Tools & Systems:** CMS integration • Third-party API integration • Netlify • Basic cloud/serverless concepts • CRM and ticketing workflows • Troubleshooting

CERTIFICATIONS

Control4 Programming Certificate: 2019 | **Project Management Certificate:** 2015
